

ESP — EASYSTUDIOPRINT V3

Large Format Printing has never been easier

- ▶ Cross platform print application for Epson, HP and Canon wide format printers
- ▶ Easy to setup and operate by using wizards and templates
- ▶ ICC profiled colour management, nesting, canvas mirroring and production control
- ▶ Save time and media
- ▶ With ESP V3 large format printing just became a lot easier

► Large Format Printing has never been easier

EPSON - HP - CANON

EASYSTUDIOPRINT supports the latest EPSON Stylus Pro printers, the HP Z-series printers and the Canon iPF photo printers. Software is provided with ICC profiles for FUJIFILM professional inkjet media.

EASYSTUDIOPRINT (ESP)

Printing just became a lot easier. Just prepare images in Adobe Photoshop® or another imaging software. Then select the image, the print size and media – and PRINT!

ESP uses 5 simple steps.

1. **Image Location** - Browse to find the folder that contains your images. Thumbnails will be generated and shown at the bottom part of the interface. Folders that are used frequently like a 'Ready to Print' folder can be added to the favorites. These folders are updated automatically.
2. **Layout** - This can be a pre-defined single size e.g. 20 x 25 cm (8 x 10 inch) or a photo pack such as the one shown in the image. You can drag and drop thumbnails.
3. **Image Options** - Here you can select fill or fit, rotate, mirror, zoom and pan. The Fit or Fill option is interesting for matching images to a preset print size.
4. **Profile** - Select the media profile by selecting the name of the paper. All necessary settings are made automatically.
5. **Print Options** - Here you can select the number of copies, crop marks, print cutter on/off and nesting.
Then press the big PRINT button.

FILE FORMATS

PSD | TIFF | JPEG | TGA | JPEG2000

PRINTERS

FUJIFILM/EPSON STYLUS PRO SERIES
HP DESIGN SERIES
CANON IPF SERIES

MAXIMUM ROLL WIDTH

17" = 430mm | 24" = 610mm | 48" = 1219mm | 64" = 1625mm
